*And if you could  
create infinite colors  
on your guests with  
a temporary effect  
and the maximum  
freedom to change?*

## NAVITAS ORGANIC TOUCH

*It is the range of product based  
on direct coloring, without ammonia  
and with organic pigments.  
Dedicated to all those who want  
to revive, to change or to correct a color  
in a delicate, simple and temporary way,  
Navitas Organic Touch is the contemporary  
answer to the need of often changing  
the color of your hair in a healthy way.*

13 nuances to be used  
pure or to be match for  
infinite chromatic effects  
and infinite reflections.

# NAVITAS ORGANIC TOUCH SHAMPOO

A light fluid that contains collagen of marine origin, oat and wheat proteins for a moisturizing and nourishing action. Free of sulphates, SLS and SLES, it contains detergents of natural origin derived from coconut and olive. It gently and deeply cleanses hair and scalp.

# NAVITAS ORGANIC TOUCH MASK

A mousse with a dense and compact consistency, rich in aminoacids and ceramides that give a powerful reconstruction action on damaged hair. Argan, musk rose and linen oils allow to untangle, illuminate and hydrate.

NAVITAS  
ORGANIC TOUCH  
KEY POINT

Easy

Like a shampoo and a mask ...  
Mix, apply and leave on ...  
Free your soul and express your  
chromatic taste, create the cocktail  
with the colors you prefer and apply.

Natural  
and safe

A line at the top of modernity and performance  
which gives maximum chromatic intensity  
while respecting the well-being of the hair,  
thanks to a certified technology.  
The presence of natural pigments,  
guarantees maximum health for the hair.

Multitasking

In this way, during the laying of the mask,  
your Guests will be able to enjoy two  
treatments in one: coloring and nourishing  
the hair. An extraordinary mix of proteins,  
collagen and organic pigments available  
to nourish and moisturize the hair structure.

Creative

Tastes and hues that come from spices  
give life to a line with spicy flavor but also  
sweet, sour or delicate. Everything depends  
on you, mix and use the nuances.

Versatile

You can use it after a bleaching work to tone  
gently both lengths and ends avoiding  
the oxidative action of permanent color.

Performing

Performance depends on the desire.  
It is valid both for hair with a bright color  
and hair which has bright or delicate hues.  
Moisturized, nourished and luminous  
hair structure. A controlled duration of 5/6  
washes gives the freedom to change  
nuance at any time.

HOW DOES  
IT WORK

HOW  
TO USE

In the salon or at home, choose the recipe  
that's right for you. It's easy, simple and fast.

1  
Navitas Organic Touch is positioned  
on the cuticles pigmenting the surface  
and recovering the damaged areas.

2  
The color remains intense and brilliant for  
4-5 washes. The intensity of reflections  
and / or color may change depending on the time  
of laying and the starting conditions of the hair.

3  
The color fades wash after wash in a  
natural and gradual manner since  
the deposited pigment is eliminated.

4  
The hair returns completely to its original  
color after 6/8 washes and it is therefore  
ready for a new effect. All this is possible  
because the pigment is positioned  
on outer part of the hair, while collagen  
and the proteins feed it inside.

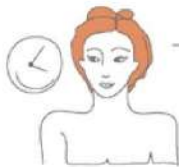

1  
Use the shampoo  
of the nuance you  
choose to cleanse  
your hair or create  
the cocktail that's  
right for you.

2  
Choose the shade  
of the mask which  
you prefer or  
create the cocktail  
that suits you.

3  
Apply.

4  
Leave the necessary  
time for the desired  
effect (minimum  
3 minutes maximum  
20 minutes).

5  
Rinse  
thoroughly.

6  
It's  
done.

## DECIDE THE INTENSITY

### Decide the intensity

The intensity of the color varies depending on the starting point. The clearer is the base (bleached or natural) the more intense and visible is the result. The darker is the base the more Navitas Organic Touch will have a reflective function and will be less impacting on the starting color.

### Decide on the shutter speed

Both the shampoo and the mask require a minimum setting time. From a minimum of 3 minutes up to a maximum of 20 minutes depending on the desired effect and the starting hair.

### Play with shampoo and mask

The ability to "play" with shampoo and mask allows you to manage the intensity of the color depending on the result you want to achieve.

## DECIDE THE APPLICATION

### Do you want to get maximum intensity?

To get the maximum saturation apply the mask of the color you want on dry hair.

Decide the shutter speed. Remember maximum 20 minutes, for an extra intense result.

Rinse and apply the shampoo leaving it still in place if the result you want is more intense; otherwise if you want to modulate the result emulsify, rinse and finish with Milk mask or again with the mask of the same shade. Leave on for 3-4 minutes and go.

### Do you want to get a pastel effect?

Apply the shampoo without emulsifying it with damp hair.

Choose the shutter speed, from 3 to 20 minutes, depending on the desire.

Emulsifies like a normal shampoo and rinses.

Apply Milk mask or the mask of the same shade depending on the desired intensity.

## BLOOMING

*reinforcing  
hair treatment*

*With an ultra-intense texture, the post-shampoo treatment, thanks to the presence of linseed oil, to a mixture of phyto-ceramides and techno-active ingredients of the latest generation, improves the structure of the keratin fibers degraded by cosmetic treatments and atmospheric agents. It has an ultra-intense cosmetic effect improving combability, shine and break resistance.*

### *product plus*

Conditioning  
action.

Plant actives:  
sunflower seeds,  
Ceramide 3  
and linseed oil

Biodegradable  
conditioner:  
it does not impact  
on sea flora and fauna

Balanced formula

The fragrance,  
soft but intense  
at the same time  
with oriental  
references, allows  
you to travel to far worlds.

# PLUMPING

*filling action*

*Just like lips or facial skin, also hair often needs to be plumped up and filled. Plumping is the ideal formulation for all those thin hair or thinned by time and treatments that need a filling action. The family is made up of shampoo and balm, to be used in synergy to give a fabulous “filler effect” to your hair.*

## specific performances

Fluffy effect

Extreme shine effect

# PLUMPING

*filler shampoo*

*Thanks to the linden extract and the presence of ultra-delicate surfactants, the shampoo has an effective and plumping cleansing action on the keratin fibers. It frees the structure and already at this stage it begins to prepare the ground for the treatment that will be applied later. The dermo affine micro-emulsion of the shampoo is recognized by the lightness of the foam that envelops the hair in a cleansing experience never experienced before for both the guest and the operator.*

## product plus

Silk effect on the hands.

“Teco active” ingredients which hydrate and replenish.

Essential and balanced formula.

# PLUMPING

*filler hair balm*

*Inspired by the most precious balm for the lips, the post shampoo treatment is a rich but light Balm. It guarantees maximum performance in the recovery of the fiber structure thanks to the skilfull blend of precious jojoba and wheat oils and the use of cationic conditioners and essential amino acids.*

## product plus

Smooth and soft texture.

Intelligent and reactive molecular formula: binds to hair.

Presence of PCA: organic substance that restores natural hydration to the skin.

Enveloping and light, the fragrance of this family is delicately floral with pleasant marine references to live a real moment of beauty relax.

# REVAMPING

## timeless action

Revamping is the ideal b.ju family to free and protect hair from the oxidative effects of the time and repeated treatments. It is not the age someone has that makes the difference but the age of the treatments that the hair has experienced. We often see young hair with a complex and painful history. The Revamping routine made up by shampoo and hair butter allows you to keep healthy, strong, young and timeless hair. Used alone, or after some other hair treatments as maintenance, it gives constant shine and brightness and helps the hair to recover its original splendor.

### specific performances

Progressive effect

Extreme shine effect

# REVAMPING

## timeless shampoo

The shampoo uses ultra-delicate surfactants, phyto-ceramides derived from sunflower oil and the latest generation of techno-active ingredients to give relief to dry and brittle hair. It immediately improves its appearance and texture. It frees the structure of unwanted residues to prepare the hair fiber to fully receive the next step.

### product plus

Sunflower vegetable extract.

A special active ingredient that restores the cuticle from the first application.

Soft and luxurious foam; it gives new life to the structure.

# REVAMPING

## timeless hair butter

The ultra-rich and nourishing butter carefully applied before or after the shampoo allows you to recover "porous" hair and tested by the degenerative action of time and treatments, visibly improving its appearance. Its formula, a true work of cosmetic engineering, completely unleashes its potential on extremely exploited and indomitable hair with a laying time of at least 10 minutes.

### product plus

Soft and smoothed texture.

Complex of organic acids inherited from Oxidock Plasma® technology.

Blend of amino acids with antioxidant and regenerating action.

A delicate hug between the light and spicy fragrance enriched by exotic notes, this is the feeling experienced thanks to the use of the Revamping hair beauty routine.

## SUPREME

*multi effect and restoring  
leave in*

It joins all 3 routines and allows you to conclude or start the treatment with a load of brilliance, hydration and nourishment in absolute lightness. Thanks to the presence of plant-based conditioners, phyto-ceramides, linseed oil and latest generation of techno active ingredients, it improves the shine of the hair. It is also a valid ally and protector in case of external agents and heat sources. Used together with the other products of the b.ju range, it is the precious ally to maximize the result and performance of the three treatments.*

### *product plus*

Ceramide 3  
of vegetable origin.

Linseed oil.

and antistatic action  
in all lightness.

The choice of the light  
cosmetic base allows  
to leave room for the  
micro-emulsion of  
functional techno-active  
ingredients, guaranteeing  
an impalpable texture,

# Your beauty ritual step by step

b. ju hair  
beauty routine  
treatment

A sensorial experience that goes beyond the performance and the efficacy of the product allowing you to welcome the new treatment as a true cosmetic one, where pleasure also has an extremely important part.

Moments to live in the salon, moments in which to feel good and in which to live the awareness of doing good for one's hair.

step 1  
welcoming

A Smile, a hug, one moment in which to feel welcomed and welcome by lowering all the resistances and establishing a dialogue.

step 2  
relax

A slightly damp and warm towel placed on the head with dry hair is what you need to stretch the skin and prepare the structure.

step 3  
preparation

A light touch, a breath of Supreme leave in necessary to soften the hair while brushing starting from the tips and going up towards the skin. A slow, light and delicate gesture.

step 4  
consultancy

According to the type of hair and the defined path, it is necessary to select the most appropriate b. ju treatment: Blooming reinforcing hair treatment, Plumping filler hair balm, or Revamping timeless hair butter.

step 5  
application

Apply the product by using a brush. As it happens in the beauty world, the product works with the brush for a greater hygiene and to guarantee a better distribution. Laying time from 5 to 15 minutes.

step 6  
laying time

A small warm and slightly damp towel, impregnated of Supreme leave in is placed again on the head for a "fluffy effect" on the scalp.

step 7  
cleansing

It is time to rinse and cleansing with the chosen shampoo: Blooming reinforcing shampoo, Plumping filler shampoo or Revamping timeless shampoo. The shampoo will be done by applying a light and pleasant massage.

step 8  
nourishment

Last application Blooming reinforcing hair treatment, Plumping filler hair balm, or Revamping timeless hair butter. Always with the brush and then proceed to distribution with a wide tooth comb. Apply for 5 to 15 minutes. Rinse and proceed with styling.

# Kibido touch step by step

During the exposure time of the mask, which varies from 5 to 15 minutes, it is recommended to perform a Kibido massage on the face. It is a massage that comes from Japanese culture, better known as "eternal youth massage". The story tells that the massage was born thanks to a Japanese empress who in 1400 year asked herself for a cure capable of maintaining its beauty over time.

What is it for? To give vigor, harmony and quiet and keep energy and youth unaltered. Important to carve out a moment of hair beauty routine by optimizing the pose times of the mask and also giving the face a touch of well-being.

The massage steps can be modulated and repeated according to the type of treatment, the time available and the wishes of the guest.

step 1  
relax

Make a pressure on the temples for 5 seconds. Continue with circular movements on the temples for 5 seconds. Repeat 3 rotations.

step 2  
activate

Make gods vertical movements using fingertips on the forehead, from the supraciliary arch to the hairline.

step 3  
toning

Make circular movements on the forehead starting from the center of the forehead and hairline of eyebrows up to reach the temples by using your fingertips. Repeat the movement until you reach the hairline.

step 4  
outstretch

Using your fingertips create light and delicate movements starting from the center of the forehead with a cross movement, following with the fingers the guest's forehead.

step 5  
caress

With your hands crossed make a gentle movement creating one pressure by sliding fingers towards temples. Repeat the movement 3 times.

step 6  
to end

Apply pressure by placing thumb, forefinger and middle: respectively the thumb on the groove under the cheekbone, the index on the chin and the middle under the chin. With gentle movements starts from the chin with your hands and go back towards the junction of the ears until you touch the upper ear area with your index finger and the area behind the ear with your middle finger. Repeat 3 times, freeing the guest from the towel with the last movement.

At KIEPE Professional we have always combined high-tech with the skillful skills of our master craftsmen.

We need technology to have extreme precision, while the skillful and wise hands can give our products that added value that we would never be able to achieve using only soulless machines.

As a skilled tailor sews his drapes we give that extra touch to each of our hairdressing scissors, comb or brush...

...each tweezers, each haircutter or underwired for aesthetics is carefully checked over and over again both with electronic eyes and with the eye of those who have gained experience in years of practice.

Our hairdryers, hairdressers and hair straighteners have a soul... that soul is given by skillful hands that know how to make a creation almost alive...

...only when you try a product of KIEPE Professional you can feel that you have not only bought an object of common use, but a companion of style, that style that only you can have.

## HOW IT ALL BEGAN...

It was the summer of '79 and Dutch beautician, Reina Castille, owner of a local hair salon was heading home when the chain on her bicycle broke. They began with humble beginnings selling their goods at local craft fairs under the name "Dapper and Dainty", an acknowledgment to the stylish and elegant beauty that their brushes bring to both women and men.
